Profile

Product Designer & Front-End Developer with over 8 years of experience creating innovative digital products, libraries, and web applications from the ground up. I believe technology goes beyond tools—it's a creative language capable of generating emotion, connection, and transformation. Self-taught and endlessly curious, often exploring disciplines beyond coding—such as visual design, creative coding, and generative arts—always seeking deeper meaning and impactful experiences. My core principle: combine strategy, creativity and code to build products that resonate and leave a lasting impact.
